

STORE WORKSHOPS

↓ TEAM BUILDING ↓ CREATIVE THINKING ↓

STORE is running Online craft and making workshops for companies looking for alternatives to work away days and Christmas events this year.

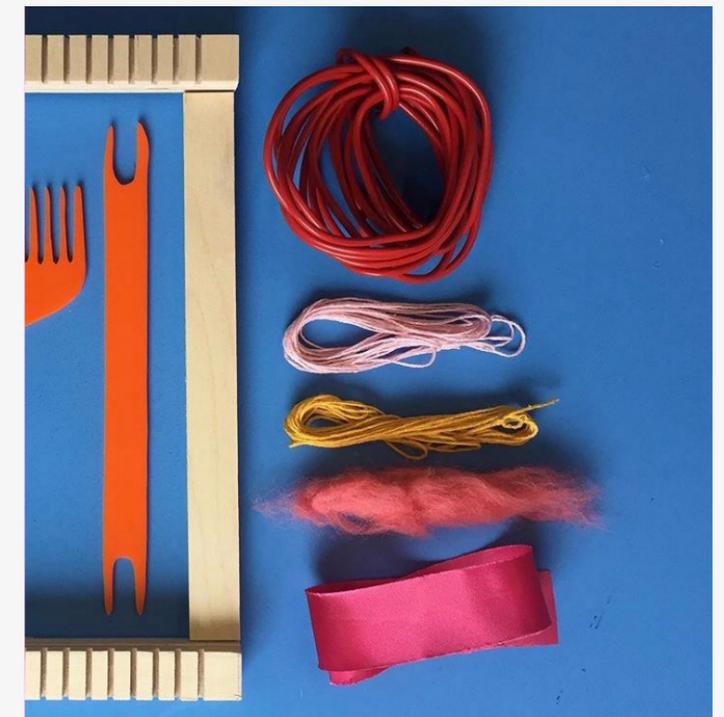

STORE is working closely with specialist designers and creative practitioners to offer this year's perfect Christmas get together. Our range of design and making online workshops are an alternative to physical courses, bringing exciting sustainable making processes into the home.

↓ TEAM BUILDING ↓ CREATIVE THINKING ↓

We have spent the last six months developing a series of workshops that take all of the best bits from our physical workshops and packs it into our new online series.

We have developed this series of online making workshops as the perfect alternative to physical get-togethers. These workshops will mix tutorial based learning with physical outcomes and exciting maker kits; the perfect early Christmas present.

↓ TEAM BUILDING ↓ CREATIVE THINKING ↓

Our workshops are a perfect way to bring a team together to explore a creative process, have a drink together and share each other's masterpieces.

↓ FOUR ONLINE WORKSHOPS ↓

ONE CHRISTMAS CARD MAKING WORKSHOP

£55 per participant

Maximum of 60 participants minimum of 15

Duration: 2hours

Description:

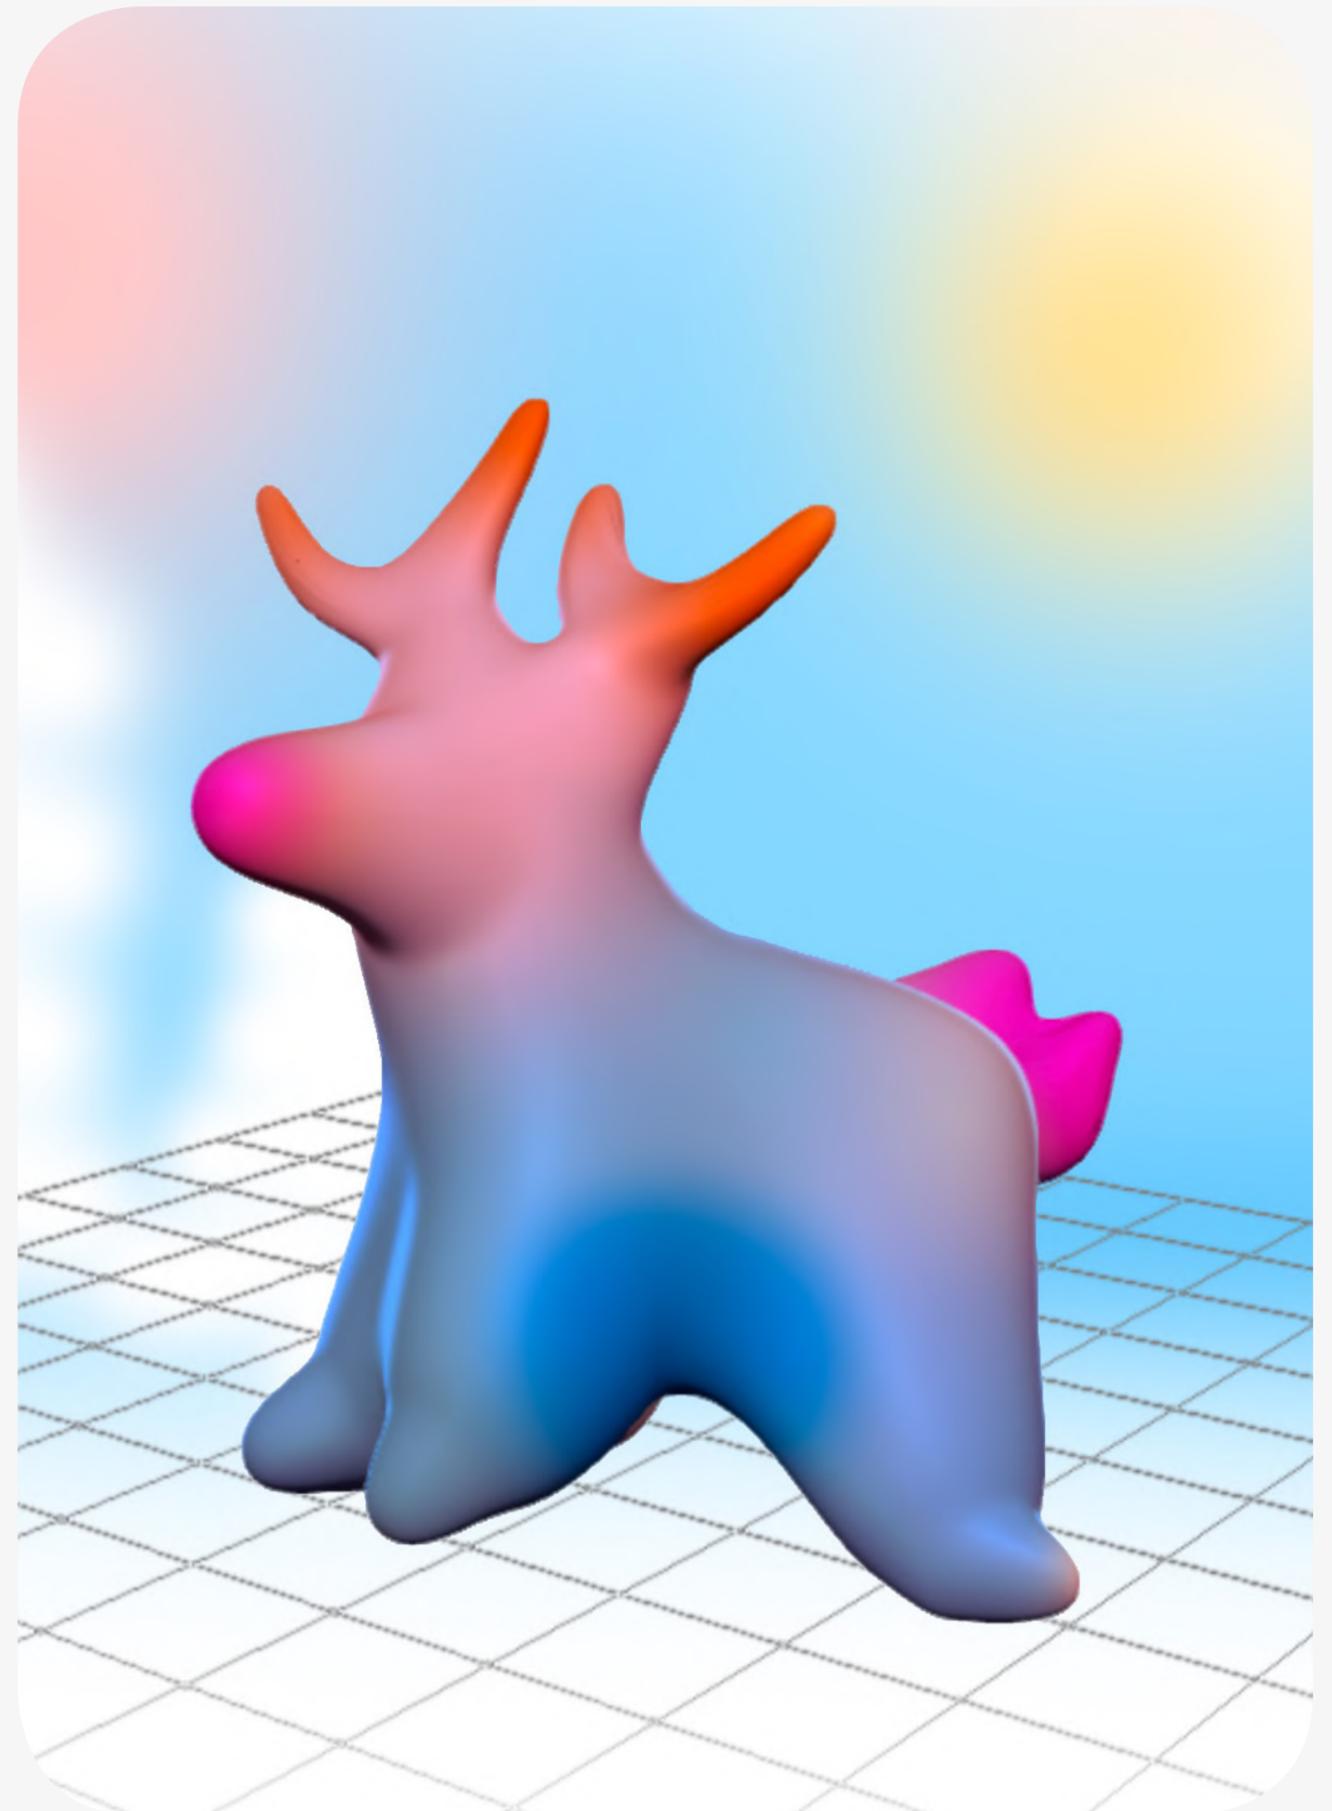

This workshop will introduce and teach you graphic design principals, 3D digital modeling and 2D digital image making, resulting in beautifully original Christmas card designs; the perfect gift for family and friends.

The course is run as a two hour making workshop where you will develop a design for a bespoke Christmas card through a series of steps using the exquisite corpse principle to create a background, 3D object and digital surface drawing. This workshop will challenge your creative thinking skills and develop your drawing skills.

At the end of the workshop we will convert each participant's image into a beautiful contemporary Christmas card design that will then be printed in packs and sent out to each participant. Each card will be printed on the sustainable 'Extract' paper; every sheet of Extract paper contains at least five up-cycled coffee cups.

Workshop benefits:

- Receive a beautiful pack of bespoke sustainable Christmas cards to send out to your loved ones.
- Work with some of the most exciting Designers working in Europe at the moment
- Gain skills in 3D digital object design and explore you creative skills
- Gain a better understanding of graphic design

TWO

FACE FILTER WORKSHOP

£45 per participant

Maximum of 60 participants minimum of 15

Duration: 2hours

Requirements:

- A Laptop with a front camera
- A Facebook login (can be created specifically for this workshop)
- A smartphone with Instagram installed

Description:

This workshop will take you through the process of designing and creating your very own unique social media facefilter. Surprise your friends over the Christmas period with your new found digital design skills. The workshop will teach you how to create digital objects, how to add lighting, sparkles, colours and textures to your face filter design before sharing each others designs through your phones at the end of the workshop.

Workshop benefits:

- Design and make your very own bespoke facefilter
- Work with some of the most exciting Designers working in Europe to develop your design
- Gain skills in 3D digital object design and explore your creative skills

THREE MYCELIUM PLANT POT WORKSHOP

£85 per participant

Maximum of 30 participants minimum of 15

Duration: 2.5 hours

Requirements:

- A cutter and cutting mat or scissors
- A bowl

Description:

This workshop will teach you about the art of designing with mycelium. You will gain insight into 3D product design as well as mycology, allowing you to grow your own planter out of the mushroom mycelium. Your planter will be sustainable and unique, and at the end of its lifespan you will be able to compost it in your garden, decomposing in as little as 45 days.

This course is delivered in two and a half hours during which time you will be given

a chance to learn more about biofabrication, and construct planter shapes as a mould for your mycelium and hemp mixture.

This workshop will both challenge your construction skills and your biology skills.

At the end of the workshop you will have a planter that will need to grow for a further two weeks before it is ready.

Workshop benefits:

- Receive an exciting kit to get you started on growing your own homeware
- Work with some of the most exciting designers working in Europe to develop your design
- End up with a unique planter for your home or as a gift
- Gain knowledge of product design
- Learn about the future of sustainable materials

FOUR

REMOTE CONTROL DRAWING MACHINE WORKSHOP

£85 per participant

Maximum of 60 participants minimum of 15

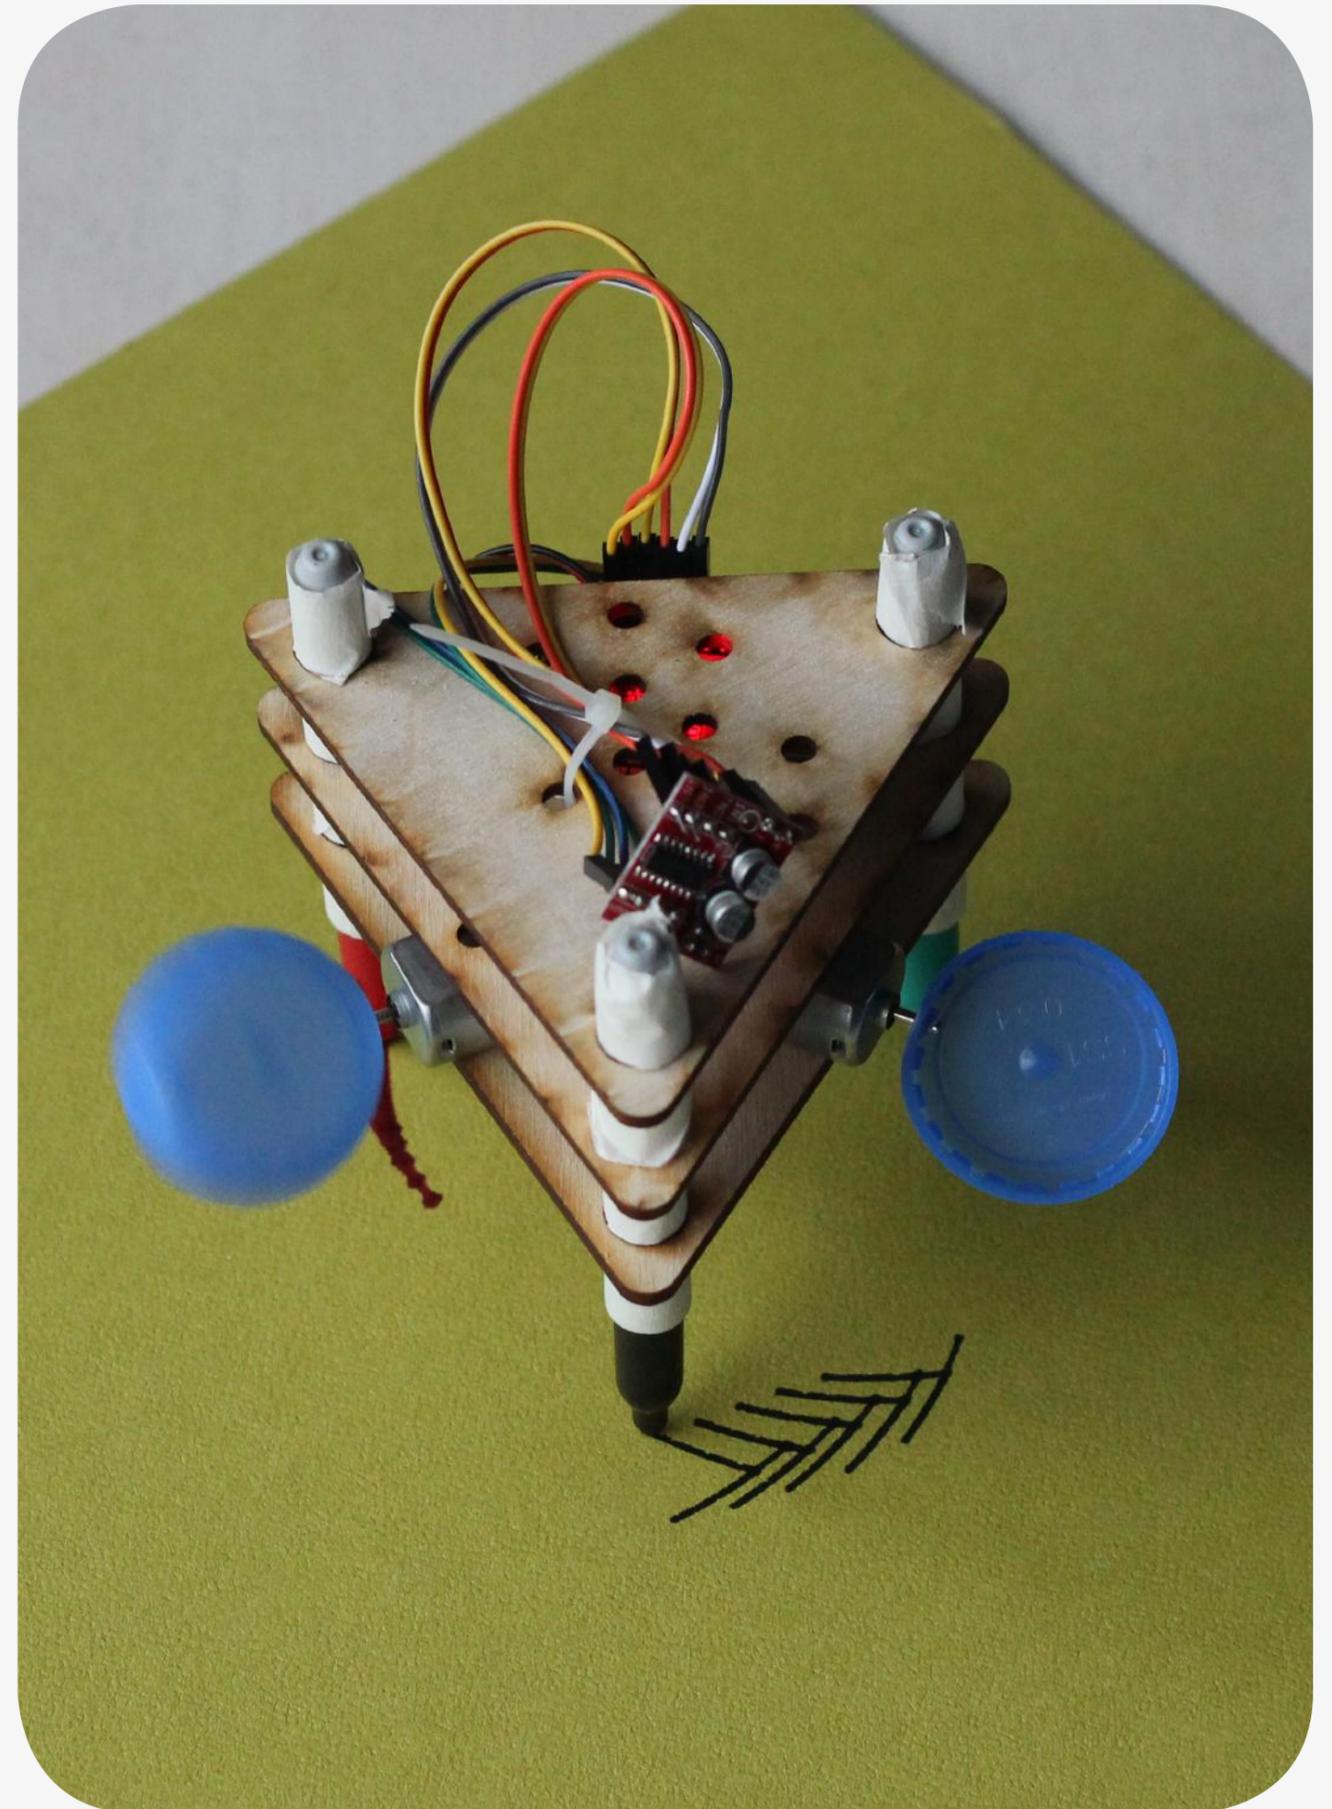

Duration: 2.5 hours

Description:

In this workshop you will be able to make your very own drawing machines, using pens, motors and electrical components to build a kinetic robot. You will learn how to use Arduino; a free programming software, allowing you to control the sketches that your robots are drawing. Each robot will be designed with remote control capabilities, giving participants control over each others machines over the internet. The final drawings will be the perfect way to exhibit your new found coding skills. No previous experience needed to take part in this workshop.

Workshop benefits:

- Receive an exciting kit of electronic components to build your robot
- Work with some of the most exciting designers working in Europe to develop your design
- End up with a fully working robot and a series of automatic drawings
- Gain knowledge of basic coding
- Learn about electronics and model making

↓ WHAT ARE THE BENEFITS ↓

1 HANDS ON SKILLS

Unlike many of the online workshops that are currently on offer we are presenting a program that will not only create a digital community but will also engage individuals in hands on making exercises, skills which people can develop further in their own time, we are hoping that these workshops can be the stimulus for people to develop their own creative interests.

2 COLLECTIVE LEARNING

We have found that these workshops are fantastic for allowing people to share their experiences of making and working with each other. The nature of these workshops is such that there are moments where participants can share their work and collaborate on each others' designs.

3 SUSTAINABILITY

All of the workshops that we will be running over the next few months will explore a facet of sustainable making, whether that is working with sustainable materials or exploring sustainable making processes.

4 CREATIVITY

In each of the workshops that we run, the process that is taught empowers each of the participants to use those skills to fulfill their own design interests. These workshops are about giving people a chance to explore their own creative process.

5 CUTTING EDGE DESIGNERS

Each workshop is taught by some of the leading designers in their respective fields. We have been working with practitioners who both excel in their fields and who have extensive teaching experience, so that everything is communicated and presented in an engaging and highly stimulating learning environment.

6 FLEXIBILITY

We work with a range of different design professionals to deliver our online workshops, and work closely with them to tailor the workshops so that they fit the requirements of the clients that we work with.

↓ GET IN TOUCH ↓

Get in contact if you would like to find out more about the workshops or if you would like us to develop a tailored workshop that suits your needs.
